

Wind Wavers™ DIY Assembly Instructions

You Will Need:

- A** Wind Wavers™ flag
- B** Mallet
- C** Heavy Duty Stackable Pole
- D** Ground Stake, Ground Stand or Roof Stand*

*(Depending on Final Assembly-see below)

Step 1 Ground Stake:

Pound ground stake with metal washer into grass or dirt with rubber mallet.

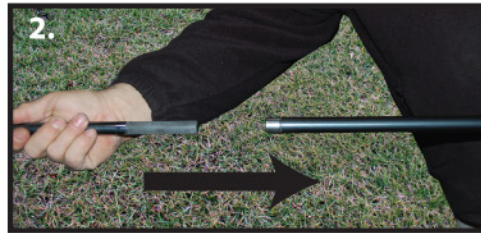

Step 2 Pole Assembly:

1. Pull out all sections from inside supplied poles. 5 sections total.
2. Assemble pole by placing smaller ends into larger ends.
3. Place smaller section into larger section until the section stops.

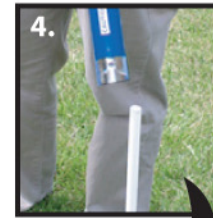

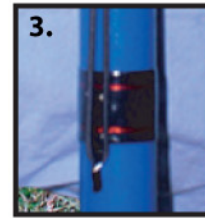

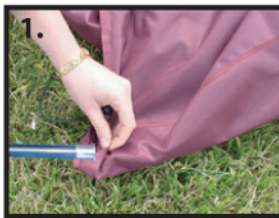

Keep wooden tip in place on pole to protect the top of the flag

Keep Tip In Place

Step 3 Flag Set Up:

1. Insert smallest pole end into sleeve opening at bottom of flag.
2. Feed pole into sleeve until it stops.
3. Secure bungee cord at bottom of flag to clip on pole.
4. Place pole over top of white rod, threaded pole or bearing assembly (see below)

Final Assembly:

Final assembly of your Wind Wavers™ will depend on the selection of ground install, ground stand or roof stand. For final assembly of a ground installed Wind Wavers™, consult **Wind Wavers™ Ground Install Instructions**. For final assembly of a ground stand Wind Wavers™, consult **Wind Wavers™ Ground Stand Instructions**. For final assembly of a roof stand Wind Wavers™ consult **Wind Wavers™ Roof Stand Instructions**.
